

I feel allowing the use of cell phone aboard the aircraft would be a huge mistake. As a flight attendant, I have difficulty doing my safety briefings while boarding to be a challenge, those on their phones don't want to give you their attention. I feel it would create a hostile environment as passengers would become irritated with the loud conversations invading their space. As a flight attendant we have enough responsibility given the duties since 9/11 without having to deal with issues among passengers. The safety issue is my biggest concern. Please-keep the phone off during the flights!!!!
